NAGESH MANSUKE

Full-Stack Developer

+91-9657432340 | mansukenagesh@gmail.com | Nanded, Maharashtra, India
LINKEDIN | GITHUB | LEETCODE | PORTFOLIO

Professional Summary

Computer Science and Engineering student with hands-on experience in full-stack web development, responsive React interfaces, REST APIs, database integration, and AI-enabled applications. Built projects involving collaborative learning, real-time communication, machine-learning-based risk prediction, and AI-assisted code repair workflows. Familiar with JavaScript, TypeScript, Python, Node.js, React, SQL/NoSQL databases, Git, and Docker.

Work Experience

Web Development Intern — June 2026 – August 2026

Bit Solve | Official SGGSIE&T College Website |Live Demo

- Contributed to the development and maintenance of the official SGGSIE&T website as part of the development team.
- Developed responsive React.js modules and integrated frontend features with Node.js, Express.js, REST APIs, and MongoDB.
- Implemented website features, investigated production issues, and supported UI/UX improvements using Git, GitHub, and Postman.

Key Projects

EduHive – AI-Powered Collaborative Learning Platform | Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB, Socket.IO, WebRTC, JWT, Google Gemini API, Tailwind CSS

- Built a full-stack learning platform concept combining courses, notes, polls, collaborative classrooms, and AI-assisted study support.
- Implemented JWT authentication and role-based workflows for student, teacher, and admin experiences.
- Integrated Gemini-powered study assistance, Socket.IO real-time events, WebRTC classroom capabilities, and MongoDB-backed REST APIs.

QuakeGuard AI – Seismic Risk Assessment Platform | Live Demo | GitHub

Python, Flask, scikit-learn, pandas, NumPy, LangChain, ChromaDB, Gemini, MySQL, SQLite, Docker

- Developed a building seismic-risk assessment platform using structural inputs such as material, foundation type, floor system, building age, and plinth area.
- Built a dual-model prediction workflow using Decision Tree and Logistic Regression to estimate damage severity and risk probability.
- Implemented a retrieval-augmented generation (RAG) pipeline with document ingestion, local embeddings, ChromaDB retrieval, and Gemini-generated guidance referencing IS 4326 and IS 13828, with a rule-based fallback report.

HYDRA CI/CD Agent – Autonomous Self-Healing Developer Agent | Live Demo | GitHub

Next.js, React, TypeScript, Python, Google Gemini, Docker, Acorn, Prisma, PostgreSQL, SQLite, SSE

- Designed a multi-agent workflow to triage failed builds and tests, analyze stack traces and Git history, and generate targeted code patches.
- Used JavaScript/TypeScript and Python AST parsing to inspect code structure and orchestrated isolated test execution through Docker or subprocess fallback.
- Built streaming pipeline logs, Git diff review, execution-history persistence, and generated post-mortem and pull request summaries.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, SQL
Web Development: React, Next.js, HTML5, CSS3, Tailwind CSS, Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL, PostgreSQL, SQLite,
AI / Machine Learning: scikit-learn, Decision Trees, Logistic Regression, Google Gemini API, RAG, LangChain, ChromaDB
Tools & DevOps: Git, GitHub, Docker, GitHub Actions, Postman, Socket.IO, WebRTC, JWT, RBAC
CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS

Education

Shri Guru Gobind Singhji Institute of Engineering and Technology (SGGSIE&T) — Nanded, Maharashtra
B.Tech. in Computer Science and Engineering — 2023 – 2027

Achievements & Leadership

- Competitive programing: Solved 300+ Data Structures and Algorithms problems on LeetCode.
- Certificate of Appreciation(SGGS Institute): Awarded for architecting and deploying the official college web system.
- Hackathon:Selected among the Top 10 teams at HackFusion 2.0, a state-level hackathon.
- Joint Cordinator:Served as Joint Coordinator of UTSAV, coordinating event planning and team collaboration.
